

## Contents

*Preface* .....

*Contents* .....

### Section I. Synthesis & Metallurgy

MS - 036. New group of stable icosahedral quasicrystals :Structural properties and formation conditions, *Tsutomu Ishimasa*, Yasushi Kaneko and Hiroshi Kaneko

MS - 055. The formation condition of a stable Cu-Ga-Mg-Sc icosahedral quasicrystal, Yasushi Kaneko, Ryo Maezawa and *Tsutomu Ishimasa*

MS - 072. Formation of quasicrystalline phases in Al-rich Al-Mn-Be alloys, *E. Fleury*, G. S. Song, H.J Chang, W. T. Kim and D. H. Kim

MS - 018. Hume-Rothery controlled formation of structurally complex alloy phases in the ternary Ga-Mg-Pd system, *Guido Kreiner*, Yuri Moguilnikov, Ulrich Burkhardt and Melanie Schapers

MS - 112. Influence of alloying on the formation of Zr-based quasicrystals *V. Khare*, R. Janlewing, D. Zander, L. Jastrow, L. Lyubenova and Uwe Köster

MS - 049. Formation of quasicrystalline related intermetallic compounds in conventionally cast Al-Fe-V-Si alloys, K. L. Sahoo, S. Das and *B. S. Murty*

MS - 107. On the crystalline and quasi-crystalline phase compounds in an Al-Li-Cu-Mg base alloy, *A. K. Mukhopadhyay* and K. S. Prasad

MS - 075. Effect of Cu substitution in AlCoNi decagonal quasicrystals *T. P. Yadav*, R. S. Tiwari and *O. N. Srivastava*

MS - 051. Synthesis of  $(Al_{65}Cu_{20}Fe_{15})_{100-x} Si_x$  quasicrystalline alloys by mechanical alloying, *B. S. Murty*, P. Barua and V. Srinivas, F. Schurack and J. Eckert

MS - 067. High energy ball milling of  $Al_{65}Cu_{20}Fe_{15}$  quasicrystalline alloy, *N. K. Mukhopadhyay*, Vinod Kurup, V. C. Srivastava, P. B. Joshi and R. K. Mandal

MS - 074. Synthesis of nano-quasicrystalline  $Al_{70}Ni_{15}Co_{15}$  decagonal phase through high energy ball milling, *T. P. Yadav*, *N. K. Mukhopadhyay* and *O. N. Srivastava*

MS - 080. Laser-induced self-propagating high temperature synthesis of amorphous and quasicrystal containing composite materials, *C. S. Wang*, *Y. F. Wang*, *L. H. Gao*, *G. Li*, *Y.L. Xia* and *C. Dong*

MS - 108. Laser cladding of quasicrystal forming Al-Cu-Fe on aluminium, *Krishanu Biswas*, *Rolf Galun*, *Barry L. Mordike* and *Kamanio Chattopadhyay*

MS - 016. Hydrogenation of Ti-Zr-Ni quasicrystals synthesized by mechanical alloying *Akito Takasaki*, *V. T. Huett*, and *K. F. Kelton*

MS - 009. Ti-Zr-Ni and Ti-Hf-Ni quasicrystals and approximants as hydrogen storage alloys, *P. C. Gibbons*, *R. G. Hennig*, *V. T. Huett* and *K. F. Kelton*

### Section II. Mathematical and Physical Modelling of Structure

MS - 085. Random cluster covering model, *Petra Gummelt*

MS - 111. 'Cluster-disordered glue' model for icosahedral quasicrystals, *R. Chidambaram*

- MS - 005. Constructing a dodecagonal structure by projection in two stages, *S. I. Ben-Abraham*, Y. Lerer and Y. Snapir
- MS - 003. Pure point diffraction, *Michael Baake* and Robert V. Moody
- MS - 060. Tilings colourful --- only even more so, *Michael Baake*, Uwe Grimm and Max Scheffer
- MS - 097. Tile Hamiltonians for decagonal phases, *Michael Widom*, Ibrahim Al-Lehyani and Marek Mihalkovic
- MS - 104. Anomalous quantum diffusion in two and three dimensional generalized Rauzy tilings, Francois Triozon, Julien Vidal, Remy Mosseri and *Didier Mayou*
- MS - 096. The arctic octahedron phenomenon in three-dimensional codimension-one rhombohedral tilings, *N. Destainville*, M. Widom, R. Mosseri and F. Bailly
- MS - 008. Kolakoski sequences --- an example of aperiodic order, *Bernd Sing*
- MS - 023. Average unit cell of a square Fibonacci tiling, Grzegorz Urban and *Janusz Wolny*
- MS - 026. Two-dimensional quasicrystals and their unit cells (ellipsian or Gaussian approximation), *Janusz Wolny* and Bart Omiej Kozakowski
- MS - 004. Vacancy ordered phases in Al-Cu-Ni as average lattices, *Anandh Subramaniam* and S. Ranganathan
- MS - 110. Cluster disordered glue model and the role of glue atoms in the icosahedral quasicrystalline structure, B. K. Godwal, *R. S. Rao* and R. Chidambaram
- MS - 115. The  $\gamma$ -brass structure and the Boerdijk-Coxeter helix, *E. Lord* and S. Ranganathan
- MS - 010. Electronic structure of the octagonal tiling, *Eeuwe Sieds Zijlstra*
- MS - 002. Quasiperiodic tilings under magnetic field, *Julien Vidal* and Remy Mosseri

### Section III. Structural Characterization

- MS - 054. Quasicrystal structure analysis, a never ending story?, *Walter Steurer*
- MS - 109. Structurally complex alloy phases, *Knut Urban* and M. Feuerbacher
- MS - 038. Structure refinement of i-Al-Pd-Re quasicrystals by synchrotron radiation data *A. Yamamoto*, H. Takakura, T. Ozeki, A. P. Tsai and Y. Ohashi
- MS - 040. Crystal Structure of a 2/1 Cubic Approximant in the Al-Rh-Si system *K. Sugiyama*, W. Sun and K. Hiraga
- MS - 086. Structure of the  $\text{Al}_{65}\text{Rh}_{27}\text{Si}_8$  2/1-2/1-2/1 approximant, *T. Takeuchi*, N. Koshikawa, E. Abe, K. Kato and U. Mizutani
- MS - 035. Structure analysis of Zn-Mg-Ho icosahedral quasicrystal by modified Rietveld method using ellipsoid and sphere windows, *Tsutomu Ishimasa*, Kei Oyamada, Yasuomi Arichika, Eiji Nishibori, Masaki Takata, Makoto Sakata and Kenichi Kato
- MS - 095. Order-disorder transition in cubic  $\text{Cd}_6\text{Yb}$  and  $\text{Cd}_6\text{Ca}$ , *R. Tamura*, K. Edagawa, Y. Murao, S. Takeuchi, K. Suzuki, M. Ichihara, M. Isobe and Y. Ueda
- MS - 113. Combined energy-diffraction data refinement of decagonal AlNiCo *M. Mihalkovic*, C. L. Henley and M. Widom
- MS - 114. A new basis for the classification of quasicrystals, H. S. Jeevan and *S. Ranganathan*
- MS - 088. Direct imaging of icosahedral clusters in a cubic  $\text{Cd}_6\text{Ca}$  approximant crystal *Eiji Abe* and An -Pang Tsai

MS - 042. Al-Ni-Ru icosahedral quasicrystal and coexisting decagonal quasicrystals with 0.4 nm periodicity, studied by atomic-resolution electron microscopic observations, *Wei Sun* and Kenji Hiraga

MS - 087. Decagonal structure of  $\text{Al}_{72}\text{Ni}_{20}\text{Co}_8$  studied by atomic-resolution electron microscopy, *Eiji Abe* and A. P. Tsai

MS - 105. ALCHEMI study of an S1 type superlattice ordered decagonal quasicrystal of  $\text{Al}_{70}\text{Ni}_{18}\text{Co}_{12}$ , *Koh Saitoh*, Michiyoshi Tanaka and An Pang Tsai

#### **Section IV. Phase Stability**

MS - 102. Phase boundaries of the  $\phi$  - $\text{Al}_{10}\text{Cu}_{10}\text{Fe}_1$  phase, *Liming Zhang* and Reinhard Lücke

MS - 012. Phase equilibrium in the vicinity of the Al-Ni-Ru decagonal phase, S. Mi, *B. Grushko*, C. Dong and K. Urban

MS - 041. Structural changes of Ni-rich Al-Co-Ni decagonal quasicrystals, *K. Saito*, W. Sun, T. Ohsuna and K. Hiraga

MS - 046. Quasicrystals in the Ti-Zr-Ni alloy system, J. B. Qiang, Y. M. Wang, D. H. Wang, M. Kramer, P. Thiel and *C. Dong*

MS - 090. Phase stability of Cd-Y-Yb quasicrystal and 1/1-1/1-1/1 approximant, *H. Takahashi*, T. Takeuchi, U. Mizutani, J. Q. Guo and A. P. Tsai

MS - 091. Structural stability of Al-Co-Cu-Ni decagonal phase, A. K. Pramanick, R. K. Mandal and *G. V. S. Sastry*

MS - 069. Role of planar defects and their energies in periodic to quasiperiodic transformations - A Monte Carlo Simulation, *U. D. Kulkarni*

MS - 081. High pressure Mössbauer studies of stable quasi-crystal  $\text{Al}_{63.5}\text{-Cu}_{24}\text{-Fe}_{12.5}$ , *Ajay Gupta*, Neelima Paul, V. Vijaykumar and B. K. Godwal

MS - 089. Hydrogen induced transformations in Zr-Cu-Ni-Al quasicrystals, Daniela Zander, *Uwe Köster* and Varsha Khare

MS - 039. Crystallization of liquids and glasses to quasicrystals, *K. F. Kelton*

MS - 059. Estimation of Gibbs free energy difference in bulk metallic glass forming alloys, *Kirit N. Lad*, K. G. Raval and Arun Pratap

MS - 063. Metastable quasicrystal phase formation in vitrified and solid state synthesised amorphous Zr-base alloys, *D. J. Sordelet*, E. Rozhkova, M. F. Besser and M. J. Kramer

MS - 116. Synthesis and devitrification of glassy Zr-Ti-Ni and Zr-Hf-Ni alloys *Joysurya Basu*, D. V. Louzguine, A. Inoue and S. Ranganathan

MS - 048. Stability of quasicrystalline phase in Al-Cu-Fe, Al-Cu-Co and Al-Pd-Mn systems by high energy ball milling, *B. S. Murty*, R. V. Koteswara Rao and N. K. Mukhopadhyay

#### **Section V Thermal and Dynamic Properties**

MS - 030 Phason-elastic energy in a model quasicrystal, *Ulrich Koschella*, Franz Gahler, Johannes Roth, and Hans-Rainer Trebin

MS - 001. NMR Methods for detection of slow atomic motions in quasicrystals *J. Dolinsek*, T. Apih, P. Jegli and M. Klanjek

- MS - 024. A comparative study of the atomic dynamics of decagonal and icosahedral AlPdMn, *M. Scheffer* and *J. -B. Suck*
- MS - 082. A comparative study of the atomic dynamics of icosahedral and decagonal ZnMgY, *J. -B. Suck*, *M. Scheffer* and *R. Sterzel*
- MS - 025. Inelastic neutron scattering study of the atomic dynamics of Al<sub>9</sub>Co<sub>2</sub>, *M. Scheffer* and *J. -B. Suck*
- MS - 032. Phonon dispersion curves of icosahedral Mg-Zn-Y quasicrystals *R.A.Brand*, *J.Voss*, *F.Hippert*, *M.Krisch*, *Sterzel*, *W. Assmus* and *I.R.Fisher*
- MS - 098. Thermal phason fluctuation in an Al-Cu-Co decagonal quasicrystal, *K. Edagawa*, *K. Suzuki*, *P. Mandal* and *S. Takeuchi*
- MS - 100. Experimental study of the dynamics of icosahedral phases, *M. de Boissieu*, *K. Shibata*, *R. Currat*, *A. Q. R. Barron*, *S. Tsutsui* and *A. P. Tsai*
- MS - 031. Atomic Dynamics in Decagonal Al-Ni-Co quasicrystals, *Franz Gahler* and *Silvia Hocker*
- MS - 062. Microsurface and bulk thermal behavior of a single grain Al-Ni-Co quasicrystal, *J. A. Barrow*, *M. C. Lemieux*, *B. A. Cook*, *a. R. Ross*, *V. V. Tsukruk* and *D. J. Sordelet*

## Section VI. Electronic & Magnetic Properties

- MS - 092. A test of Hume-Rothery rules for stable quasicrystals, *A. P. Tsai*
- MS - 077. Electronic structure of quasicrystalline compounds, *Esther Belin-Ferre*
- MS - 052. Interpretation of the Hume-Rothery rule in quasicrystals and their approximant, *Uichiro Mizutani*, *Tsunehiro Takeuchi* and *Hirokazu Sato*
- MS - 014. Ab initio Studies on Chemical Bonding in Cd- and Zn-based Quasicrystals, *Y. Ishii* and *T. Fujiwara*
- MS - 020. Covalent bonding and semiconducting band-gap formation in Al-transition-metal quasicrystalline approximants, *M. Krajci* and *J. Hafner*
- MS - 028. Effective medium range Mn-Mn pair interaction induces pseudogap in the density of states of Al(Si)-Mn approximants, *Guy Trambly de Laissardiere*, *Duc Nguyen-Manh* and *Didier Mayou*
- MS - 068. Resonances stabilization triggered by hybridization effects, *J. Barzola-Quiquia*, *M. Lang*, *D. Decker* and *P. Haussler*
- MS - 033. Studies of icosahedral AlPdRe quasicrystals across the metal-insulator transition, *O. Rapp*, *V. Srinivas*, *P. Nordbald* and *J. Poon*
- MS - 019. Electronic conductivity scaling of quasiperiodic approximants to decagonal aluminium, *M. Krajci*, *J. Hafner* and *M. Mihalkovic*
- MS - 045. Electronic transport of the icosahedral Zn-Mg-Sc quasicrystal and its cubic approximant, *J. Hasegawa*, *R. Tamura*, *S. Takeuchi*, *K. Tokiwa* and *T. Watanabe*
- MS - 093. Electrical resistivity of the Al<sub>65</sub>Rh<sub>27</sub>Si<sub>8</sub> 2/1 cubic approximant, *Naokiyo Koshikawa*, *Shinichi Yoda*, *Keiichi Edagawa*, *Ken Minoda*, *Ryuji Tamura* and *Shin Takeuchi*
- MS - 103. Evidence for a marginally conducting state in AlCuFe and AlPdMn quasicrystals, *Francois Triozon* and *Didier Mayou*
- MS - 011. Structure defects of icosahedral quasicrystals as electrically active centres *Alexandre F. Prekul*, *N. Yu. Kuz'min*, *N. L. Shchegolikhina*

- MS - 101. Thermoelectric properties of Al-based icosahedral quasicrystals, *T. Nagata*, K. Kiriwara and K. Kimura
- MS - 079. Observation of pseudo-gap and Kondo behaviour in  $\text{Al}_{70}\text{Pd}_{30-x}\text{Mn}_x$  quasicrystals, *Gayathri N. Banerjee*, S. Banerjee and R. Goswami
- MS - 053. Magnetic and electrical properties of a new type Zn-Mg-Sc icosahedral quasicrystals, *Senni Motomura*, Yasushi Kaneko, Shiro Kashimoto, Hiroshi Nakano, Tsutomu Ishimasa and Susumu Matsuo
- MS - 043. Magnetic and electrical properties of Cu-Ga-Mg-Sc icosahedral quasicrystal, Hidetoshi Yamada, Senni Motomura, Ryo Maezawa, Yasushi Kaneko, Hiroshi Nakano, Tsutomu Ishimasa and *Susumu Matsuo*
- MS - 022. Universal magnetic behaviour of icosahedral, F, F<sub>2</sub> and F<sub>2M</sub> Al-Pd-Mn quasicrystals, *F. Hippert*, M. Audier, J. J. Prejean, A. Sulpice, V. Simonet and Y. Calvayrac
- MS - 021. A local approach of magnetism in icosahedral Al-Pd-Mn quasicrystals through Nuclear Magnetic Resonance studies, V. Simonet, *F. Hippert*, C. Berger and Y. Calvayrac
- MS - 007. Magneto-resistance studies in  $\text{Al}_{70}\text{Pd}_{20+x}\text{Mn}_{10-x}$  ( $x=0, 1$ ) icosahedral quasicrystal, Archana Jaiswal, R. Rawat and *N. P. Lalla*
- MS - 006. A crossover from Mott to Efros-Shklovskii hopping conduction in insulating  $\text{Al}_{70}\text{Pd}_{22.5}\text{Re}_{7.5}$  quasicrystals-a magnetoresistance study, Hung-Cheng Fang, Tzung-I Su, *Shui-Tien Lin* and Ralph Rosenbaum
- MS - 056. Long range antiferromagnetic order in Ising model simulations in two-dimensional Penrose lattice, *Susumu Matsuo*, Shoji Fujiwara, Hiroshi Nakano and Tsutomu Ishimasa
- MS - 057. Magnetoresistance of highly resistive AlPdRe quasicrystals, *V. Srinivas*, O. Rapp and S. J. Poon
- MS - 083. Swift heavy ion irradiation on  $\text{Al}_{62}\text{Cu}_{25.5}\text{Fe}_{12.5}$  quasicrystals *Ratnamala Chatterjee* and Alope Kanjilal

## Section VII Mechanical Properties

- MS - 027. Temperature dependence of dislocation processes during plastic deformation of i-Al-Pd-Mn single quasicrystals, *Ulrich Messerschmidt*, Lars Ledig and Martin Bartsch
- MS - 044. Plastic deformation of binary icosahedral quasicrystal of Cd-Yb, Y. Imai, T. Shibuya, R. Tamura and *S. Takeuchi*
- MS - 071. The toughening of Al-Cu-Fe(-B) quasicrystals by Sn particles, *E. Fleury*, Yu-Chan Kim, Do-Hyung Kim, Do-Hyang Kim, and Won-Tae Kim
- MS - 029. Crack Propagation in perfectly ordered quasicrystals and random tiling quasicrystals, *Christoph Rudhart*, Peter Gumbsch and Hans-Rainer Trebin
- MS - 070. Tribological behavior of plasma sprayed Al-Cu-Fe + Sn quasicrystalline composite coatings, *Tianmin Shao*, Xiankun Cao, Eric Fleury, Do Hyang Kim, Meng Hua and Dao Se
- MS - 017. Sliding on a quasiperiodic substrate, *T. Janssen*
- MS - 065. Friction and fretting on quasicrystals under vacuum, *Jean-Marie Dubois*, Pierre Brunet, Walter Costin and Andreas Merstallinger

### Section VIII Surfaces and Thin Films

- MS - 066. A model of wetting on quasicrystals in ambient air, *J. M. Dubois*
- MS - 013. Experimental evidence of the stability of net planes in decagonal quasicrystals, *Cynthia J. Jenks*, Jennifer Bjergaard, Paul Canfield, Amy R. Ross, Antonio Cervellino, Walter Steurer and Patricia A. Thiel
- MS - 099. Cleaved surfaces of d-AlNiCo and  $\xi'$ -AlPdMn, *C. Cecco*, C. Barth, P. Gille, M. Feuerbacher, G. Krausch and M. Reichling
- MS - 094. SEM and AFM studies of 5-fold surface of AlPdMn quasicrystal subjected to UHV Treatment, Yu Fuxiao, Maarten Bischoff, Amy R. Ross, Thomas A. Lograsso, Herman van Kempen and *Ted Janssen*
- MS - 084. Quasicrystal surfaces as templates for artificial aperiodic systems : from nanoclusters to epilayers, *R. McGrath*, J. Ledieu, E. J. Cox, N. Ferralis and R. D. Diehl
- MS - 015. Thin Sn film induced by surface diffusion on a quasiperiodic surface of decagonal Al-Ni-Co, *M. Shimoda*, J. Q. Guo, T. J. Sato and A. -P. Tsai
- MS - 064. Real time study of the growth of i-AlCuFe in very thin films obtained by simultaneous deposition of the components, *N. Bonasso* and Philippe Pigeat
- MS - 034. Initial oxidation of quasicrystals - an investigation by high-resolution RBS and ERD, D. Plachke, A. Khellaf, M. Kurth, A. Szokefalvi-Nagy and *H. D. Carstanjen*
- MS - 058. Oxidation kinetics of an AlCuFeCr approximant compound: an ellipsometric study, *G. Bonhomme*, M. LeMieux, P. Weisbecker, V. V. Tsukruk and J. M. Dubois
- MS - 050. Oxidation behaviour of AlCuFe nanoquasicrystal powder, V. Srinivas, P. Barua, T. B. Ghosh and *B. S. Murty*
- MS - 047. Corrosion and oxidation behaviour of amorphous and nanoquasicrystalline states in Zr<sub>70</sub>Pd<sub>30</sub> and Zr<sub>80</sub>Pt<sub>20</sub> alloys, K. Mondal, U. K. Chatterjee and *B. S. Murty*
